Spring cure with a heart: Alzchem donates twice and raises 5,000 euros for Chiemgau Lebenshilfe

Trostberg. A spring full of energy – that was the goal many Alzchem employees had set themselves at the beginning of the year. The company was happy to support its staff and offered all those, who were interested a free spring cure with Alzchem's product LIVADUR®. This dietary supplement made from pure creatine, magnesium and vitamin D3 provides targeted support for the muscles and boosts the energy supply to the cells.

A total of 437 employees took part in the campaign and received for three months' LIVADUR® supply free of charge to see the effects of taking the product over a longer period of time. As a concession thank you, Alzchem called on its employees to make a voluntary donation to the non-profit organization "Chiemgau Lebenshilfe Werkstätten" in Traunreut. This organization is committed to supporting and promoting people with disabilities.

The response was overwhelming and in total a significant amount was donated. Alzchem increased this amount, so that a total donation of EUR 5,000 could be achieved.

On September 25, 2024, Andreas Niedermaier, CEO of the Alzchem Group, presented the donation check to Dr. Jens Maceiczky, Managing Director of the Chiemgau-Lebenshilfe workshops, on the Alzchem premises.

"We are very pleased with the great interest shown by our employees in our creatine product LIVADUR® and the generous donations. Together, we have not only improved our health, but also made a valuable contribution to the region," emphasizes Andreas Niedermaier, CEO of the Alzchem Group.

Dr. Jens Maceiczky, Managing Director of Chiemgau Lebenshilfe Werkstätten: "Our mission is to enable people with disabilities to participate in working life and to belong in our society. Our

AGILE SCIENCE PURE RESULTS

sincere thanks go to Alzchem and its employees for their contribution, which has further improved the quality of life of people with disabilities.”

About Alzchem

Alzchem is a globally active specialty chemicals company that is one of the market leaders in most of its fields of activity. Alzchem offers answers to various global developments such as climate change, population growth and increasing life expectancy. We deliver solutions through brands and products of the highest quality and through a sustainable vision to help shape global developments.

The company sees interesting growth prospects for itself in the areas of human and animal nutrition and agriculture in particular. As a result of population growth, it is necessary to achieve efficient food production. Pharmaceutical raw materials and creatine products can contribute to a healthy old age as life expectancy increases. Alzchem is facing up to the goal of sustainability arising from climate change in the field of renewable energies and across the entire company. The fields of fine chemicals and metallurgy offer just as great a perspective.

Alzchem Group AG’s broad product range includes dietary supplements, precursors for PCR tests and pharmaceutical raw materials. These offerings are the company’s response to global trends and developments. Alzchem is ideally positioned in this respect and considers itself well prepared for an environmental future and global developments.

The company employs around 1,690 people at four production sites in Germany and a plant in Sweden, as well as three sales companies in the USA, China and England. Alzchem generated Group sales of EUR 540.6 million and EBITDA of EUR 81.4 million in 2023.
